DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Application/Control Number: 10/552,008 Page 3

Art Unit: 1791

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 10 are rejected on the ground of nonstatutory obviousness-type double patenting as being obvious over claims 1-2 of U.S. Patent No. 7455797 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

The claims of the US '797 cover a method of producing a particulate suspension comprising providing:

- a supercritical fluid, that is carbon dioxide
- a first solvent that is soluble in the supercritical fluid;
- a second solvent that is substantially insoluble in the supercritical fluid and
 is at least partially soluble in or miscible with the first solvent;
- and a solute that is soluble in the first solvent and is substantially insoluble
 in the second solvent and the supercritical fluid;
- contacting the first solvent, the second solvent and the solute together to form a solution:
- contacting the solution with the supercritical fluid in an extraction chamber maintained at a temperature and pressure above the critical point of the supercritical fluid, the supercritical fluid extracting the first solvent from the solution and thereby causing the solute to precipitate in the form of particles that become suspended in the second solvent and thus form the

particulate suspension;

• separating the particulate suspension from the first solvent by flowing the first solvent out of the extraction chamber with the supercritical fluid via a backpressure regulator, separately flowing the particulate suspension out of the extraction chamber and into a collection vessel, isolating the collection vessel from the extraction chamber, and draining the particulate suspension from the collection vessel.

Bubbling the supercritical fluid and particles of the claimed size range are user defined method of producing the product and would have been obvious to one having ordinary skill in the art at the time of the invention.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAEED M. HUDA whose telephone number is (571)270-5514. The examiner can normally be reached on 8:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Griffin can be reached on (571) 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
